Little Interest Marks Trans actions on Market.

WHEAT REPORT EXCELLENT

port Favorable - Buoyancy Returns-Speculators in Doubt-Strike don Money Rate Declines.

New York, April 38.-Although the stock market to-day was no more active than it has been lately and transactions were even slightly less than they were yesterday, the strength of the market was greater than on any previous day in the

week.

There was duliness at first, but it was evident that the supply of stocks for sale was not large and that speculative reasons for attacks upon values such as that found a week ago in anticipation of a poor report made by the United States Steel Corporation were almost entirely

Indeed, although to-day's run of news contained little of interest, it was characterized by the one great favorable factor that has put in an appearance in the present week, the spread of magnificent crop weather all over the country and the continuing brightness of the promise in this regard is plainly beginning to have some effect upon general business.

The advance summaries of the trade
journals available this afternoon indicate
that the higher temperatures have benefited retail business, even if wholesale
commodities prices are not greatly changed.

Speculators Interested.

And yet it is undeniable that the strong elements in the existing financial and elements in the existing financial and business position are being pressed more and more to the front in the minds of that class of capitalists, sometimes called speculators, whose business it is to fore-see future conditions far off and discount

Speculators, whose business it is to forest. A considerable of the construction of the

house statement differed a good deal, prophecies varying between a gain in cash by the banks of about \$5,000,000, and cash by the banks of about \$5,99,000, and a loss of nearly the same amount. The banks have seemingly gained heavily from the interior of the country on direct shipments, but, or the other hand, country balances with local institutions have been drawn down to pay for out-of-town subscriptions to new security issues.

Bright Weather, Is Best Feature of Week.

New York, April 21.—Bradstreet's, April 29. will say:

"The features of the week have been a slight atimulation of retail trade by warm, bright weather North, West, and East, good progress in growing of leading ceresi crops, and astisfactory developments as regards the outlook for leading fruit crops. The greater activity in retail trade in turn is reflected in a little better business by jobbers, but on the other hand, unseasonably wet and cool weather has checked farming operations at the South and also made for quilet in trade.

"Stock markets are dull, but the piling up of money at leading centers, and the easing of rates caused thereby, has been an incentive to buying of bonds, which show one of the most active weeks of the year. Commodity markets are not greatly changed, the most important feature being the strengthening of cotton prices, which are 25 points higher on the week. Wheat is slightly lower on good winter and spring wheat crop reports and the corn and oats are not greatly changed, but fat hops show some rallying from the depressed prices ruling a week ago."

"Pig iron very dull and production is being curtailed; in finished lines new business is light and mill outputs have decreased. Heavy sales of copper are reporting as having been made at reduced prices.

"Business failures for the week ending April 17 were 540 against 253 last week, and 180 in the like week of 1910.
